

MICROSOFT SHAREPOINT FOUNDATION 2013-2016

SITE USER

1 day course

Course Code: 91107

COURSE OBJECTIVE

In more professional environments today, people work collaboratively in teams. Information technology and applications facilitate this by allowing people to easily share, access, edit, and save information. Microsoft® SharePoint® 2013 is a platform specifically designed to facilitate collaboration, allowing people to use familiar applications and Web based tools to create, access, store, and track documents and data in a central location. In this course, you will learn about and use a SharePoint Team Site to access, store, and share information and documents. SharePoint is a complex platform with many features and capabilities. A strong understanding of those features and capabilities will allow you to work more efficiently and effectively with SharePoint, and with the documents and data stored in SharePoint. Furthermore, effective use of new social networking capabilities will allow you to identify, track and advance issues and topic most important to you, and collaborate with colleagues more effectively.

TARGET STUDENT

This course is designed for Microsoft SharePoint site users who need to understand what SharePoint is and how to access information within a SharePoint site.

PREREQUISITES

To ensure your success in your course you should be have basic end-user skills with Microsoft Windows 7 or 8 and any or all of the Microsoft Office 2007, 2010, or 2013 suite components, plus basic competence with Internet browsing.

COURSE OBJECTIVES

Upon successful completion of this course, students will be able to:

- Access and navigate SharePoint content.
- Add, upload, modify, search for, and preview documents in document libraries.
- Add and modify items in lists, configure list views, and filter and group lists.
- Create and update your profile; tag, share, and follow content on your personal sites; and
- create and manage a personal blog.
- Access, create, save, and manage document versions and synchronize data with Microsoft Office applications.
- Synchronize SharePoint data, work offline, and access data from a mobile device.
